

Tailor-made On-site training

Outline

HYDAC can provide customised training solutions to organisations, based on your company's particular needs.

From the office to the work site, no place is out of reach. We can cater for small / large group sizes, rotating work shifts, etc...

We can offer training needs analysis to help identify knowledge gaps, and we can tailor the training to target your particular applications and equipment.

Examples

We've delivered customised training courses for several organisations, including AGCO, BHP Billiton, Rio Tinto, Woodside, Chevron, Glencore and others.

As an example of that, we recently created a specialised hydraulic course for AGCO Corporation, a global leader in the design, manufacture and distribution of agricultural solutions. AGCO is an organisation that recognises the importance of continuous learning and they want to ensure that their employees and dealers have the knowledge to keep them ahead of the competition.

Contact us

In order to book your customised training, give us a call on 1300 449 322 or email training@hydac.com.au.
